Tanger Med

Dear Hiring Team / To Whom It May Concern,

I am writing to express my interest in joining Tanger Med as a Junior Back End Developer. With a Bachelor's Degree in Software Engineering and Information Systems from ENSA Kenitra, and hands-on experience gained from internships at FeverTokens, Ibn Tofaïl University, and Marsa Maroc, I am confident in my abilities to contribute effectively to your team.

During my internship at FeverTokens, I led the development of the FeverTokens Package-Oriented Transpiler, a transformative tool streamlining contract integration with OpenZeppelin Contracts V5. This project involved converting contracts into packages using Typescript and Solidity, enhancing efficiency and code modularity within the development process.

At Marsa Maroc, I played a key role in building a responsive full-stack web application for managing ships, workers, and reporting issues. Leveraging my expertise in Laravel, I ensured seamless functionality and user experience, contributing to improved operational efficiency within the organization.

Additionally, my experience at Ibn Tofaïl University involved developing a responsive full-stack web application for managing laboratory budgets. Utilizing Laravel framework and Livewire, I implemented dynamic features for efficient data management and visualization, further enhancing administrative tasks.

I am available for an interview starting next month, as I will be completing my internship at FeverTokens on May 13th. Regarding my Bachelor's degree, I am on track to graduate in July, and my studies are flexible, taking place on weekends and being remote. This schedule ensures that my academic commitments will not conflict with my work schedule. I am excited about the opportunity to discuss how my background, skills, and enthusiasm can contribute to the continued success of Tanger Med.

Enclosed is my CV for your review. I am looking forward to the possibility of contributing to Tanger Med and am available at your earliest convenience for an interview.

Thank you for considering my application. I am eager to learn more about Tanger Med and explore how I can be a valuable asset to your team.

Warm regards,

Youssef Jemmane
